DOCSIS/EuroDOCSIS 3.0  
VoIP Cable Modem

On January 27<sup>th</sup> 2010, Thomson changed its company name to Technicolor. All product data sheets, including those for products which still carry the Thomson name, now reflect our new Technicolor brand.

With the evolution of cable standards, DOCSIS/EuroDOCSIS 3.0 will prove decisive for cable operators wishing to provide high bandwidth data delivery and to stay ahead of the content with game and video over IP delivery. With this second generation of High Speed Data Services Solution, Technicolor keeps up to eight (8) bonded downstream channels and four (4) bonded upstream channels, with a design backward-compatible for use as a single-channel with DOCSIS/EuroDOCSIS 2.0 and older networks without any service interruption.

The new THG571 comes in the sleek attractive design Technicolor has adopted as the new «family look».
